

Kinetico Super Hi-Efficiency Softener

The Kinetico Model S650 combines non-electric, twin softener tank technology with special resin beads that allows it to consistently be the most efficient softener Kinetico offers.

With only 7 gallons of waste water and one pound of salt usage per cleaning cycle, the Model S-650 is not only environmentally friendly, but also saves thousands of gallons a year in waste water compared to an electric softener.

With just an 11 minute cleaning cycle, you won't have hours of noisy cleaning cycles at 2 am as with an electric softener. And since the Model S-650 is totally water powered, you'll never have to reset timers after a power outage.

Choose our small 16" x 12" x 20" salt tank if space is tight. We can actually stack the softener on a shelf above the salt tank to conserve even more space.

Choose the 18" x 35" salt tank if you want more storage capacity. A four person family using 300 gallons of water a day in 20 grains of hard water would only need to fill this tank about every 7 ½ months.

Simple, easy, one step maintenance. That's Kinetico!

Kinetico 2040s OD

OVERDRIVE[®]
ENHANCED

Non-Electric,
High Performance
Water Conditioning System

 **Kinetico**[®]
home water systems

Conditioned Water 24 Hours a Day, Every Day

Simple, Reliable and Economical Operation

Twin Tank Design

Certified Performance

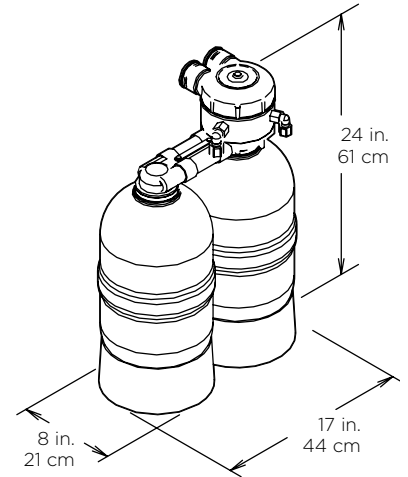

Installation and Service by Trained Water Treatment Professionals

Regeneration requires only:

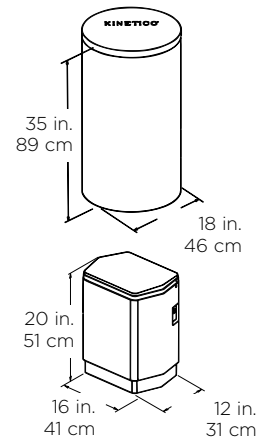

- 7 gallons of water
- 11 minutes
- 1 lb. of regenerant

What Makes The Kinetico Overdrive[®] Enhanced 2040s OD Different?

- 1. Non-Electric Operation.** Reliable. No timers or computers to set, adjust, repair or replace.
- 2. Metered, Demand Service.** Unlimited supply of clean, soft water. Eliminates guesswork, water and regenerant waste, and hard water breakthrough.
- 3. Twin Tank System.** Unlimited supply of clean, conditioned water. Enables system to regenerate with clean, conditioned water.
- 4. Overdrive Enhanced.** All tanks are in service simultaneously. Increases performance, efficiency, flow rate and media life.
- 5. High Flow Rate.** System keeps up with the conditioned water needs of today's demanding households.
- 6. Large Porting Size.** Perfectly suited for larger plumbing found in many homes. Up to 1 1/2 inch.
- 7. Efficient Hardness Removal.** Assures consistent and continuous clean, soft water. Saves money on soaps and cleaners. Protects plumbing and appliances.
- 8. High Efficiency, Packed Resin Bed.** More efficient hardness removal. Conserves regenerant and water. Increases performance.
- 9. Efficient Use of Water and Regenerant.** Low water consumption. Less money spent on regenerant.
- 10. Corrosion-Resistant Valve and Tanks.** Long lasting. Can endure harsh environments.
- 11. Soft Water, Countercurrent Regeneration.** Increases product efficiency and water quality.
- 12. Automatic Operation.** Just add regenerant.
- 13. Outstanding Warranty.** Dependability, peace of mind.
